

| Safety Data Sheet                      |   | Approval:                   |
|--|---|-----------------------------|
|  |   | Issued on                   |
|  |   | 30 Jun 23'                  |
| (1) Product and Company Identification |   |                             |
| Product Name                           | Air Freshener (K-10 DIFFEREN AIR VENT)                                |                             |
| Manufacturer                           |   |                             |
| (2) Composition                        |   |                             |
| <u>Component</u>                       | <u>CAS No.</u>  | <u>Weight Percent Range</u> |
| Fragrance                              | Compound  | 25~55%                      |
| Isoparaffins                           | 64742-48-9  | 45~75%                      |
| BHT                                    | 128-37-0  | <0.3%                       |
| Tinogard TL                            | 125304-04-3   | <0.5%                       |
| (3) Hazard Identification              |   |                             |
| Principal hazards                      | Harmless to Human under ordinary use                                  |                             |
| Specific risks                         | None  |                             |
| Labeling                               | None  |                             |
| (4) First Aid Measurement              |   |                             |
| Inhalation                             | Not relevant  |                             |
| Ingestion                              | seek medical advise immediately<br>show the product or the packaging. |                             |
| Skin contact                           | wash immediately with warm water.                                     |                             |
| Eye contact                            | wash immediately with warm water.                                     |                             |
| (5) Fire Fighting Method               |   |                             |
| Extinguishing media                    | Do not use water distinguisher  |                             |
| (6) Accidental Release Measures        |   |                             |
| Individual Precautions                 | : No special protection required.                                     |                             |
| Environmental protection               | : Abandone after use.   |                             |
| Cleaning method                        | : No special way.   |                             |

|   |  |
|---|--|
| (7) Handling and Storage                          |  |
| Handling precautions                              | No special demands                         |
| Storage precaution/conditions                     | Keep products under 30 degree C preferable |
| (8) Exposure controls and personal protection     |  |
| Arrangement of the workplace                      | No special demands                         |
| Personal protection                               | No special demands                         |
| (9) Physical and Chemical Properties              |  |
| Appearance  | Liquid                                     |
| Color   | Based on the color of Fragrance            |
| Odor  | Good Fragrance                             |
| Solubility  | Complete                                   |
| Density   | 0.80-0.84(at 20 )                          |
| PH value  | not measurable                             |
| (10) Stability and Reactivity                     |  |
| Stability   | Stable                                     |
| Hazardous reaction                                | Non  |
| (11) Toxicological Information                    |  |
| Acute toxicity                                    | Basically all ingredients are safe         |
| Skin irritation                                   | Not irritating                             |
| Inhalation  | Not known under normal use                 |
| Eye contact                                       | Not known under normal use                 |
| Ingestion   | Not known under normal use                 |
| (12) Biodegradability                             |  |
|   | Recyclable, but not Biodegradable          |
| (13) Disposal Considerations                      |  |
| Product   | Recyclable                                 |
| Packing   | Empty packing can be re-cycled             |
| (14) Transportation                               |  |
|   | no particular regulation                   |
| (15) Regulatory Information                       |  |
| Labeling  | No dangerous labeling required             |
| (16) Other Information                            |  |
| DIFFEREN AIR VENT is an air freshener for Car use |  |
